Seas of Green

Seas of Green is hiring skilled, full-time landscape architects eager to grow their careers.

Since 2009, we've shaped outdoor spaces with over 8,000 projects worldwide. We are experts in the art of landscape and hardscape design in the United States, and we want you to be part of our journey.

If you have a passion for design, enjoy drafting, are a team player, and value great client service - all while being comfortable working remotely - we think you'll be a perfect fit.

We operate fully remotely, and you'll have the flexibility to manage your own schedule. But remote work doesn't mean working alone - you'll join a collaborative, team-driven environment with all the support and tools you need.

What We're Looking For

- Degree in Landscape Architecture
- Strong design and drawing experience
- Impressive portfolio and references
- Full proficiency in AutoCAD
- Full proficiency in MS Office
- Full proficiency in English
- 3D rendering skills (preferred but not required)

Role Overview

You'll be tasked with a wide range of landscape architectural work on U.S. projects, including design, construction drawings, quantity take-offs, permit plans, CAD work, etc.

Remuneration

We offer a competitive salary, overtime at higher rates, and a client management program that provides extra earnings potential. The starting salary will depend on your level of experience and skill.

How to Apply

If you're interested, email us at contact@seasofgreen.net with an introduction that highlights your qualifications, experience, and why you're the right fit for this role. Be sure to include a sample of your portfolio. If your application catches our eye, we'll be in touch to discuss next steps.
